

## PRESS RELEASE

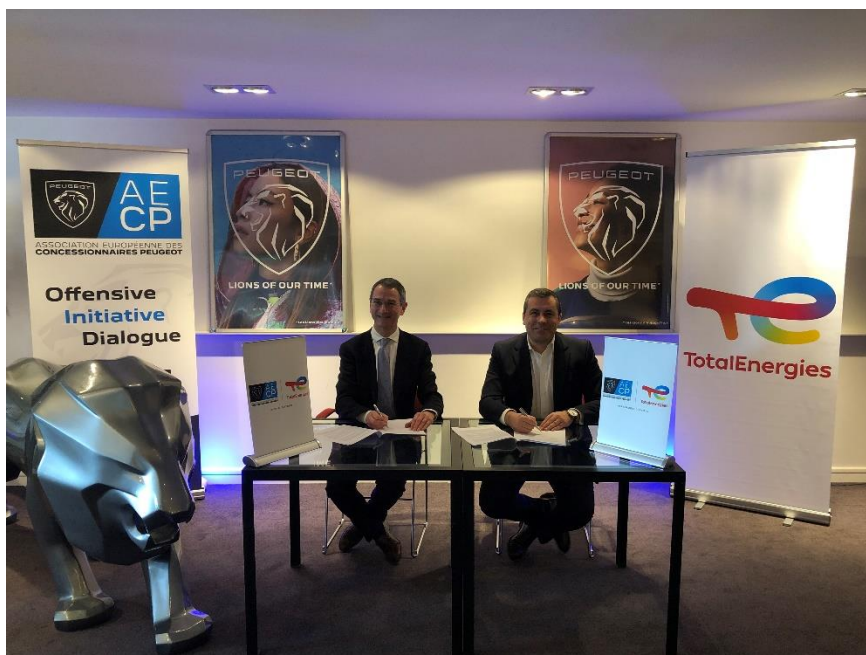

## TotalEnergies Lubrificants

### TotalEnergies is lending support to Peugeot dealers in Europe

TotalEnergies Lubrificants is proud to be extending its partnership with the European Association of Peugeot Car Dealers (AECPCP) for the next five years, through the end of 2026.

The AECPCP, which brings together dealers from eleven European countries, works hand in hand with Peugeot and Stellantis Group to establish professional guidelines for automotive retailing and ensure close collaboration between the brand and its network.

TotalEnergies has been a partner to Peugeot for more than 25 years, particularly through its exclusive recommendation of TotalEnergies products in the dealer network. This new agreement strengthens the long-standing ties and mutual trust that exist between TotalEnergies and Peugeot's networks of car dealerships in Europe. It ensures that those Peugeot networks will enjoy the benefit of TotalEnergies' comprehensive, multi-energy offering and tailored mobility solutions.

Jean Parizot, Vice-President Automotive at TotalEnergies Lubrificants,  
and AECPCP President André Figueiredo

“This five-year renewal of the agreements between the AECPCP and TotalEnergies is a real mark of our mutual trust. The automotive industry – automakers and distributors alike – is facing new environmental challenges, while energy providers are having to tackle those issues as well. New European Union regulations on CO2 emissions and decarbonizing the industry are spurring more and more innovation on a daily basis. So we will continue to work closely together on getting Peugeot's European network equipped with charging infrastructure as well as mobility solutions.” says **André Figueiredo, President of AECPCP**.

Adds **Jean Parizot, Vice-President Automotive at TotalEnergies Lubrifiants**: “It’s clear that the automotive industry is in the midst of a major transformation. We’re facing new demands as a result of low-emission vehicles and stringent regulations on CO2 emissions. We need to provide the market with high-performance, environmentally friendly lubricants. It’s our responsibility to provide our partners with our full expertise and skills, so that we can also offer effective, innovative solutions when it comes to new forms of transportation. We’re delighted to be continuing our adventure alongside the AECP to support European dealers in the Peugeot network.”

### **About TotalEnergies Lubrifiants**

TotalEnergies is a leading global manufacturer and marketer of lubricants, with 42 production sites around the world and more than 5,800 employees in 160 countries. TotalEnergies' Lubricants division offers innovative, high-performance and environmentally friendly products and services, developed by its R&D centers, which employ over 130 researchers. TotalEnergies' lubricants division is a key partner for players in the automotive, industrial and marine markets.

### **About the Marketing & Services division of TotalEnergies**

TotalEnergies' Marketing & Services business segment offers its professional and private customers a wide range of broad energy products and services—petroleum products, biofuels, charging and related services for electric vehicles, gas for road and maritime transportation—to support them in their mobility and help them reduce their carbon footprint. Every day, over 8 million customers visit our 16,000 service-stations all over the world. As the world’s number four in lubricants, we design and sell high-performance products for the automotive, industrial and maritime sectors. And to provide the best response to the needs of our B2B customers, we deploy our sales forces, our international logistics network and our diverse offering. We operate in 107 countries, where our 31,000 employees stand close to all of our customers.

### **About TotalEnergies**

TotalEnergies is a global multi-energy company that produces and markets energies on a global scale: oil and biofuels, natural gas and green gases, renewables and electricity. Our 105,000 employees are committed to energy that is ever more affordable, cleaner, more reliable and accessible to as many people as possible. Active in more than 130 countries, TotalEnergies puts sustainable development in all its dimensions at the heart of its projects and operations to contribute to the well-being of people.
